1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/36125

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/36125

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-42</u>	NO
Industrial applicability (IA)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-42 lack an inventive step under PCT Article 33(3) as being obvious over McGarry et al. Independent claims 1, 5, 9 and 26 each lack an inventive step based on the prior art of McGarry. Dependent claims 2-4, 6-8, 10-25 and 27-42 also lack an inventive step as being obvious over McGarry.

The claimed invention provides systems and methods for managing relationships between the parties involved in a trading network using a messaging format, exemplified by claim 1, which is called "a method of managing messages in a trading network."

Regarding independent claim 1, as exemplary, McGarry discloses a system for capturing trade information (Title). McGarry's method, though not identical to that of Applicant's invention, suggests each element of claim 1. McGarry's method has a storage means available to each user ([0039]. Trading orders or "deals" are received and "captured" for pre trade processing, execution and post trade processing and are categorized into workflow stages (p. 3, [0051]). Electronic communications are moved along by each user to the next user or group of users (Fig. 1). User relationships are established for each action state of a trade (p. 4, [0066]-II. 1-3). Users are identified in sequence with appropriate authorizations for viewing and action, and user relationships. Users may specify which users or groups of users should be prompted to process an action ticket ([0066]-II. 8-10). A carrier message is contained in each communication which is the primary action focus of the message. Each dependent claim is obvious detail to McGarry's disclosure. It would have been obvious to an ordinary practitioner of the invention at the time of Applicant's invention to have applied the McGarry disclosure to provide computer automated systems and methods for managing relationships between the parties involved in a trading network using a messaging format, motivated by the need to enhance the efficiency and effectiveness of back office trade processing (McGarry, page 1, [0004]-[0005]).

Claims 1-42 meet the criteria set out in PCT Article 33(4), and thus contain industrial applicability because the subject matter claimed can be made or used in industry.
